

Customer Sales Report

Overview:

This Dashboard presents an overview of the Pricing and Marketing analytics of a Retail Company

Pricing Analytics:

Revenue Forecast: This visual highlights how revenue has grown over the years and also forecasts revenue in the upcoming year

Pricing Groups: This visual identifies the pricing groups that have generated the highest revenue. It aids in refining our pricing strategy by applying targeted pricing options for different segments

Revenue by Category: This graph helps identify the top-selling categories, enabling us to adjust pricing strategies based on demand

Market Analytics:

Demand Forecast: This visual illustrates historical demand trends and projects future demand for the upcoming year

Sales by Shopping Mall: This visual provides insights into sales performance across various locations. By analyzing this data, we can optimize our marketing strategies at each site to maximize profits.
